**Database:** MongoDb
**Tools:** Firebase, Github, Vercel, Netlify, Surge, Figma, Chrome Dev Tools

## PERSONAL PROJECTS

**1. Skill-Sphere**                                    **Online Presence | Client Source | Server Source**

Skill Sphere is a digital learning and teaching hub, offering courses to students from a variety of instructors.
- Signed-up students can explore courses and register for a course using Stripe payment gateway.
- A signed-up user can apply to be a teacher in the platform and offer courses upon approval by the admin.
- Admin can authorize teacher and course request, and view student reviews for each course via dashboard.

**Technology stack:** Tailwind, React, React router, DaisyUI, Axios, JWT, Tanstack Query, Express.Js, MongoDb, Firebase, Stripe.

**2. Plate-2-Plate**                                    **Online Presence | Client Source | Server Source**

Plate-2-Plate is a community food sharing platform that facilitates the sharing of excess food with those in need.
- User can see all available foods and search for food by typing the food name in the search bar.
- User can see food details and request for the food.
- A user can enlist foods for donation, update, delete their added food and manage the delivery status of a requested food.

**Technology stack:** Tailwind, React, React router, DaisyUI, JWT, Express.Js, MongoDb, Firebase.

**3. Style Savvy**                                    **Online Presence | Client Source | Server Source**

Style Savvy brings the convenience of ordering luxury fashion items from the comfort of your home.
- A registered user can browse through product brands and view the items available under each brand.
- User can add product under a brand, see details of a product and update a product.
- User can add product to cart from product details.

**Technology stack:** Tailwind, React, React router, DaisyUI, Express.Js, MongoDb, Firebase.
